

Robert von Wolfradt Takes Reins as Iowa CIO

News Staff | May 4, 2012

Iowa Gov. Terry Branstad announced this week that Robert von Wolfradt has been named the state's chief information officer.

Wolfradt most recently served as CIO for Wyoming, under former Gov. Dave Freudenthal. In Wyoming, Wolfradt installed the first statewide [cloud-based](#) email system in the country. He is also credited with leading significant IT consolidation efforts in Wyoming.

Gov. Branstad had this to say in an announcement of the appointment: “Robert is exactly the right person to lead our efforts to improve state government’s efficiency and effectiveness through technology. Robert’s qualifications are second-to-none, and Iowa is fortunate to have such a forward-thinking talent in this pivotal position.”

Wolfradt holds a master’s degree in computer resources and information management from Webster University, and a B.S. in computer science from the University of Maryland.

According to Gov. Branstad’s announcement, Wolfradt also previously served as director of information services for Snohomish County, Wash.; chief operating officer of Schoolkit.com; and served in the United States Air Force.
