

New Products from Lenovo, Logitech, Powerbag

Miriam Jones | February 28, 2012

Handstand

[Lenovo](#) touts its IdeaPad YOGA as the first multimode notebook with a 360-degree flip-and-fold design. YOGA offers four usage modes: notebook, tablet, stand and tent. YOGA measures 0.67 inches at 3.1 pounds and supports eight hours of battery life with up to 8 GB RAM and 256 GB SSD.

Square Mouse

The [Logitech](#) Cube functions as a pocket-size mouse and presenter. As a mouse, it scrolls when a user swipes a finger along the main panel, similar to a touchscreen smartphone. Users lift the device in the air to use it in presenter mode. The Cube's 2.4 GHz connectivity lets users connect up to six compatible devices.

Power Up

[Powerbag](#) backpacks, messenger bags and slings charge mobile devices right in the bag. The universal smart-charging system powers mobile devices that can be charged using a USB cable. Powerbag's internal, rechargeable and removable battery plugs into any standard wall outlet with the included AC adapter to recharge. Connect up to four mobile devices at a time using the pre-routed connectors.
